### TRENTON SCHOOL NEWS

The parents and teachers of this place met and organized a P. T. A. on Wednesday, October 19, 1927. We have had three meetings and are already doing some wonderful things.

The ideals and aims of the Association are to build up a greater, happier, holier America, through securing to the child (which is the greatest asset) the best possible advantage. As parents we must endeavor to understand our own children, their needs, and "keep the home fires burning" for them.

The P. T. A. of Trenton extend an invitation to all who are not already members, and join in the slogan "Every child an equal chance."

The Parent-Teachers Associations throughout the county are on the increase. Several new ones are reported each week. In many schools the parents are actively taking part in the programs. No matter how small the community, a Parent-Teachers' Association will benefit the school. Of course, the teacher has to be the leader in this as in everything else, but she will be paid many fold.
